

HUYNH THANH NGHI

Lead Game Designer • Project Manager | Mobile F2P • Live Ops

Ho Chi Minh City, Vietnam • (+84) 353-656-140 • huynhthanhngi0212@gmail.com

Portfolio: [nghihuynh0212.github.io/game-designer](https://github.com/nghihuynh0212/game-designer) • LinkedIn: [linkedin.com/in/nghi-huynh-thanh](https://www.linkedin.com/in/nghi-huynh-thanh) • itch.io: hatching-chickens.itch.io/latte-night

SUMMARY

Game designer with 5+ years shipping and live-operating mobile F2P titles — mainly for the Japanese market — 10M+ combined downloads across three titles in three genres.

- Grew from Game Designer / Operator to Lead Game Designer & Project Manager at enish; now lead 8 designers inside a 26-person team, from concept through launch and live ops.
- Design decisions backed by data: D1 retention 44% → 73% after a playtest-driven training-loop redesign; D30 7% → 9–10% after a live RNG rebalance.
- Core craft: systems & level design, GDD authoring, event/gacha economy design, KPI-driven live ops — plus AI agents that cut routine QA to under 10 min/day.
- Trilingual bridge between JP and VN teams and IP holders — Japanese JLPT N1, English TOEIC 970.

EXPERIENCE

Lead Game Designer • Project Manager — enish Vietnam

08/2025 – Present

Yowamushi Pedal: Resonance Pedalism — training sim / bicycle racing (anime IP, F2P) • launched 07/2026 • 90K+ downloads in first month • 4.0+ store rating

- **Team:** Led 8 game designers within a 26-person team (plus outsourced partners) from concept to launch and live operations; design decisions directed the output of the UI, engineering and art teams.
- **Production:** Planned milestones and sprints; ran sprint planning, daily stand-ups and sprint retros; assigned and reviewed tasks; mentored VN and JP designers.
- **Core features:** Owned the training simulation and race system from benchmark research (Uma Musume: Pretty Derby, Blue Lock: Project World Champion) and GDD to UI wireframes and shipped build; added new mechanics after test plays so the game stood apart from its benchmarks.
- **Playtest-driven redesign:** Cut the training cycle by two-thirds between test plays so players reached progression and new content faster — D1 retention rose from 44% to 73%.
- **Balance fix:** Traced D30 retention (7% vs. a 10–15% target) to late-game RNG that made training and purchases feel meaningless; rebalanced RNG to matter most in evenly matched races and fade as the power gap grows, backed by win-back campaigns — D30 rose to 9–10%.
- **Content pacing:** Sequenced content so players explore PvE and PvP first and Guild-vs-Guild follows two weeks after launch — kept the launch on track and matched how competitors pace players into competition.
- **Economy:** Designed training and race level progression; planned IAP packs and gacha lineups — the title holds the highest paying-user ratio of any enish title to date.
- **IP & art quality:** Wrote the gacha illustration quality standard used with the IP holder, turning vague art feedback into review criteria; handled promotion and image-rights approvals.
- **AI tools:** Built AI agents for daily bug-checks on master data and code (routine QA check now under 10 min/day), master-data entry from level-design docs (zero doc-to-data mismatches), and consistent GDD formatting, doc review and reports.

Game Designer • Game Operator — enish Vietnam

02/2021 – 08/2025

De:Lithe Last Memories — roguelike action RPG (F2P / Web3) • 09/2022 – 08/2025 • launched 06/2024 • 800K+ downloads

- Led the in-game (battle) team and new-feature development for the project.
- Owned the competitive modes (ranked PvP and GvG) end-to-end: GDD, development follow-through, launch and post-launch tuning; ranked seasons have run continuously since 12/2024.
- Designed 60+ stages (32 main-story, 12 daily, gold-farming, PvP and GvG arenas), plus monsters, bosses and character skills from concept to balancing — all shipped on schedule, with the art, sound and voice orders for each placed and managed by me.
- Served as the primary JP–VN liaison across the project lifecycle; trained new designers in both offices.
- Tuned battle feel with engineers in the in-house action-command system; directed BGM/SE/voice with sound designers.

The Quintessential Quintuplets: Can't Divide the Puzzle Into Five — anime IP match puzzle (F2P) · 02/2021 – 03/2022 · 9.2M downloads

- Led the 4-person Vietnam team running live ops: event puzzles, gacha, campaigns, SNS and push notifications.
- Shipped an event every two weeks and a major campaign with a new or improved feature every quarter for 13 months with no missed release dates — idea to master data to release; wrote official release notes in Japanese.
- Designed event puzzle levels and set difficulty from live data (clear rate, completion, DAU, ARPPU).
- Shipped UI/UX improvements from competitive reference and wireframes through to release; worked on the "Cooking Raiha" idle-cooking system, which drew a strong positive player reaction on social media.

PERSONAL PROJECTS

Latte Night — 2D game, published on itch.io

05/2025 – 09/2025

- 2-person team (design + engineering): defined core gameplay, art direction and story; designed stages, monster behavior, player controls and lighting from prototype to release.

Light Escape — 2D prototype, Unity (solo)

03/2025

- Solo rapid-prototyping exercise built in 4 hours: defined the core gameplay concept, design pillars, art direction and story background, then assembled a playable prototype using Unity assets and AI-assisted workflows.

SKILLS

- **Game design:** GDD authoring · systems & combat design · level & puzzle design · gacha/IAP economy · UI wireframing · playtest iteration
- **Live ops & data:** KPI analysis (DAU, ARPPU, D1/D7/D30 retention) · event planning · operation calendars · master data
- **Production:** milestone & sprint planning · stand-ups & retros · task assignment & review · cross-team coordination · mentoring · IP holder liaison
- **Tools & AI:** Figma · Unity · Redmine · Google Sheets · Cacao · Excel · AI agents for QA, master data and documentation
- **Languages:** Vietnamese (native) · Japanese (JLPT N1) · English (TOEIC 970) · trilingual interpretation

GAMES I PLAY

- **Know deepest:** Umamusume: Pretty Derby (348 hrs on Steam) · Blue Lock: Project World Champion · Dark War Survival · Arena of Valor
- **Also play:** Cult of the Lamb · Sea of Stars · Little Nightmares I & II · God of War · The Last of Us · Horizon · Summoners War · Brawlhalla — gacha, strategy, MOBA, roguelite, RPG, puzzle-horror and action-adventure.

EDUCATION

Ho Chi Minh City University of Law — Japanese Law program

2014 – 2018

Asuka Japanese Language School, Japan

2018 – 2020

RECOGNITION

- Best Employee of the Year, enish Vietnam — three consecutive years.
- The Japan Foundation program for young Japanese researchers in Vietnam (2018); J-Debate 3rd place (2017); Nagoya University Summer Seminar (2017).

LEADERSHIP & WORKING STYLE

- Research- and evidence-driven: break an unfamiliar genre or system down through benchmarks and live data before proposing a design.
- Lead by example and take accountability for team outcomes, not just my own tasks.
- Turn analysis into specs other people can build from, and communicate them across disciplines — design, engineering, art, and business — in three languages.
- Empower and mentor: give designers the tools and room to make decisions and grow.
- Stay calm and adaptable under pressure, shifting requirements, and live-ops deadlines.

CAREER OBJECTIVE

Aiming to grow into a Game Producer: deepening my game design craft in a professional, multicultural environment and shipping titles for global markets.

Long-term goal: to lead a game the world proudly knows as made in Vietnam — and led by a woman.
