

HUYNH THANH NGHI

LiveOps & Game Design Lead | Anime-IP Mobile F2P • Character-driven Events

Ho Chi Minh City, Vietnam • (+84) 353-656-140 • huynhthanhngghi0212@gmail.com

Portfolio: nghi.huynh0212.github.io • LinkedIn: linkedin.com/in/nghi-huynh-thanh • itch.io: hatching-chickens.itch.io/latte-night

SUMMARY

5+ years running live operations on anime-IP (ACGN) mobile F2P titles — 3 titles, 10M+ combined downloads — owning LiveOps calendars, character-driven events, gacha and store items, and backing each call with player data.

- Owned the LiveOps calendar end-to-end: planned a quarter ahead and re-tuned it as daily KPI data came in; a Silver Week campaign I built lifted purchases 150%.
- Data-anchored: segment comparisons (churned vs. retained, spenders vs. non-spenders) and post-event reviews feed straight into the next event — D30 retention 7% → 9–10%, D1 44% → 73%.
- Cross-functional operator: marketing & SNS campaigns, Customer Support briefings, store listings on Google Play / App Store, partner webshops, and Japanese IP holders and developers.
- Native Vietnamese, fluent English (TOEIC 970), Japanese JLPT N1.

EXPERIENCE

Lead Game Designer • Project Manager — enish Vietnam

08/2025 – Present

Yowamushi Pedal: Resonance Pedalism — training sim / bicycle racing (anime IP, female-majority audience) • launched 07/2026 • 90K+ downloads in first month • 4.0+ store rating

- **LiveOps calendar:** Planned the operation calendar a quarter ahead — story, ranking, login-bonus, birthday, anniversary and collab events, plus gacha and packs — and re-tuned it as daily KPI and player data came in; plans approved by the Japan office's Chief of Production.
- **Holiday campaign:** Spotted the 5-day Silver Week holiday ahead of time and built a short campaign for it (special PvE event, packs, login bonuses) to keep players engaged — purchases rose 150% vs. the same period before.
- **Fixing a weak event:** A 1-day event with only login bonuses, missions and an exchange shop faded fast. I added a short 1-day ranking that pushed players to speed up their training — activity, spending and resource use all rose.
- **Character-driven economy:** Players are IP fans who spend most on their oshi (favorite character). I schedule banners around birthdays and holidays, put the most popular characters on the days I want to push hardest, and rotate character types — the title holds the highest paying-user ratio of any enish title.
- **Retention intervention:** Compared players who churned around day 30 with those who stayed and traced it to late-game RNG that made training and purchases feel meaningless; rebalanced RNG to matter most in evenly matched races and ran win-back campaigns — D30 rose from 7% to 9–10% (target 10–15%).
- **Event reviews:** After every event I review participation and completion, revenue vs. the previous similar event, best-selling packs and price points, DAU, and CS / review / SNS feedback; findings are prioritized and fixed in the next event (e.g. missions too hard to finish in time → lower difficulty next round).
- **Proposals & benchmarks:** Each proposal carries one recommended plan backed by detailed data, plus alternatives with pros and cons and the reason for the pick; benchmarked Umamusume: Pretty Derby and Blue Lock: Project World Champion schedules.
- **Store & webshop:** Decided which packs and items to sell and at what price, and registered them on Google Play Console and the App Store; worked with partners (Game8, AnimateGo) to set up webshops for those packs.
- **Marketing, CS & IP:** Planned SNS campaigns with marketing alongside in-game campaigns; briefed Customer Support on approved plans under a no-spoiler rule; handled IP-holder approvals for promotions and image rights.
- **Player requests → features:** Players asked for returning-player rewards: I used AI agents to research how other games do it, list options, check what already existed and draft specs — reviewing and deciding at every step.
- **Launch & team:** Cut the training cycle by two-thirds between test plays — D1 retention rose from 44% to 73%. Led 8 designers in a 26-person team with sprint planning, stand-ups and retros.

Game Designer • Game Operator — enish Vietnam

02/2021 – 08/2025

De:Lithe Last Memories — character-driven action RPG with character gacha & events (F2P / Web3) • 09/2022 – 08/2025 • launched 06/2024 • 800K+ downloads

- Owned the competitive modes (ranked PvP and GvG) from GDD to launch and seasonal tuning — ranked seasons running continuously since 12/2024.
- Designed 60+ stages plus monsters, bosses and character skills, all shipped on schedule; placed and managed the art, sound and voice orders for each.

- Primary JP-VN liaison across the project lifecycle; trained new designers in both offices.

The Quintessential Quintuplets: Can't Divide the Puzzle Into Five — anime IP match puzzle (F2P) · 02/2021 – 03/2022 · 9.2M downloads

- Led the 4-person Vietnam team running the full LiveOps pipeline: event puzzles, character gacha, campaigns, SNS and push notifications.
- Held a two-week event and quarterly feature cadence for 13 months with no missed release dates; staggered production so two events were always in flight.
- Set each event's difficulty from the previous event's data (clear rate, completion, DAU, ARPPU); wrote official release notes in Japanese.
- Planned character gacha under the IP holder's rule that every banner features all five sisters, so no fanbase felt favored.
- Worked on the "Cooking Raiha" idle system, which gave event materials a use so lapsed players had a reason to return — it drew a strong positive reaction on social media.

SKILLS

- **LiveOps:** quarterly LiveOps calendars · holiday & seasonal campaigns · character-driven events & gacha · IAP pack design · retention & win-back campaigns · event proposals with a recommended option
- **Data:** KPI analysis (DAU, ARPPU, D1/D7/D30 retention) · segment comparison (churned vs. retained, spenders vs. non-spenders) · post-event reviews · competitive benchmarking
- **Cross-functional:** marketing & SNS campaigns · CS briefings · pack pricing & store registration (Google Play Console, App Store) · partner webshops (Game8, AnimateGo) · IP holder & developer relations
- **Tools & AI:** Redmine · Google Sheets · Excel · Figma · Unity · Cacao · AI agents for QA, master data and documentation
- **Languages:** Vietnamese (native) · English (fluent, TOEIC 970) · Japanese (JLPT N1)

GAMES I PLAY

- **ACGN, gacha & female-oriented:** Umamusume: Pretty Derby (348 hrs on Steam) · Blue Lock: Project World Champion (female-majority audience) · Idols of Starlight (otome) · Summoners War · Dark War Survival · Arena of Valor
- **Also play:** Cult of the Lamb · Sea of Stars · Little Nightmares I & II · God of War · The Last of Us · Horizon · Brawlhalla

PERSONAL PROJECTS

Latte Night — 3D game, itch.io (2-person team)

05/2025 – 09/2025

Light Escape — 3D prototype, Unity (solo, 4 hours)

03/2025

EDUCATION

Ho Chi Minh City University of Law — Japanese Law program

2014 – 2018

Asuka Japanese Language School, Japan

2018 – 2020

RECOGNITION

- Best Employee of the Year, enish Vietnam — three consecutive years.
- The Japan Foundation program for young Japanese researchers in Vietnam (2018); J-Debate 3rd place (2017); Nagoya University Summer Seminar (2017).

OBJECTIVE

Seeking a LiveOps role on character-driven ACGN titles, where I own the calendar and back every event with data.

Long-term goal: to lead a game the world proudly knows as made in Vietnam — and led by a woman.
