SUMMARY

Game producer and lead designer with 5+ years taking mobile F2P titles from concept to launch and live ops — 3 shipped titles across 3 genres, 10M+ combined downloads, mainly for the Japanese market.

- End-to-end ownership of a new anime-IP title, leading a 26-person cross-functional team through launch and live ops.
- Product decisions driven by playtests and live data — e.g. D1 retention 44% → 73% after a playtest-driven redesign.
- AI built into production for QA, master data and documentation.
- Trilingual bridge between JP and VN teams and IP holders — Japanese JLPT N1, English TOEIC 970.

EXPERIENCE

Lead Game Designer • Project Manager — enish Vietnam

08/2025 – Present

Yowamushi Pedal: Resonance Pedalism — training sim / bicycle racing (anime IP, F2P) • launched 07/2026 • 90K+ downloads in first month • 4.0+ store rating

- **Product direction:** Took the title from concept to live ops — set the core loop from competitor benchmarks and differentiated it after playtests.
- **Team & rituals:** Led 26 people across design, engineering, art, UI, QA, sound and marketing plus outsourced partners, with sprint planning, stand-ups and retros.
- **Planning & scope:** Planned milestones through closed beta and made scope calls to protect the schedule — e.g. moved Guild-vs-Guild to two weeks after launch.
- **Data-driven iteration:** Used playtest and live data to fix drop-off points and tune the game after launch — D1 44% → 73%, D30 7% → 9-10%.
- **Monetization & live ops:** Planned IAP packs, gacha lineups and the operation calendar — the title holds the highest paying-user ratio of any enish title.
- **Quality & AI:** Set art quality standards and approvals with the IP holder; built AI agents that cut routine QA checks to under 10 min/day.
