SUMMARY

5+ years running live operations on anime-IP (ACGN) mobile F2P titles — 3 titles, 10M+ combined downloads — owning LiveOps calendars, character-driven events and gacha, and backing each call with player data.

- End-to-end LiveOps calendar ownership, from quarterly planning to post-event review and iteration.
- Data-anchored decisions across retention, monetization and event design — e.g. D30 retention 7% → 9–10%.
- Cross-functional work with marketing, Customer Support, store platforms, IP holders and developers.
- Native Vietnamese, fluent English (TOEIC 970), Japanese JLPT N1.

EXPERIENCE

Lead Game Designer • Project Manager — enish Vietnam

08/2025 – Present

Yowamushi Pedal: Resonance Pedalism — training sim / bicycle racing (anime IP, female-majority audience) • launched 07/2026 • 90K+ downloads in first month • 4.0+ store rating

- **LiveOps calendar:** Plan the operation calendar a quarter ahead — events, gacha, packs and campaigns — and adjust it as daily KPIs move; e.g. a Silver Week holiday campaign lifted purchases 150%.
- **Character-driven economy:** Schedule banners and events around fans' favorite characters, birthdays and holidays — the title holds the highest paying-user ratio of any enish title.
- **Data & retention:** Compare player segments and review every event's results, then fix issues in the next one; e.g. traced a D30 drop to late-game RNG and rebalanced it with win-back campaigns (7% → 9–10%).
- **Proposals:** Propose events as a recommended plan backed by data plus alternatives, benchmarked against leading ACGN titles.
- **Store & webshop:** Set pack lineups and pricing, register them on Google Play and the App Store, and run partner webshops.
- **Cross-functional:** Coordinate SNS campaigns with marketing, brief Customer Support before releases, and manage IP-holder approvals.
- **Team & tools:** Lead 8 designers in a 26-person team; build AI agents for QA, master data and turning player requests into specs.
